DROSPECTUS OF THE UNITED States Illustrated.—Under the title of the United States Illustrated, has been commenced the publication of a great national work, of a very costly and magnificent description, for which the liberal patronage of the American public is confi-dently expected. It will appear in parts with such promptitude that two volumes will be completed before the close of the present year. These vol-umes will be issued simultaneously, one being exclusively devoted to eastern and the other to wes tern subjects. Each part will contain four steel engravings, from original drawings by eminent artists, representing either some remarkable view from the splendid landscape scenery of the country, or some public edifice, whose architectural beauty or historical character entitles it to such commemoration. Ten parts will compose a vol

But if excellence has thus been aimed at in the engravings, the literary department also will have every attention bestowed upon it. No expense has been spared to render the work in this also a national monument. Many of the best and popular writers of the country are engaged as regular contributors, and the editorial direction of the whole has been entrusted to the care of Mr. Charles A. Dana, whose name is a sufficient guarantee that the work will be one of solid merit, as well as of elegance and beauty. Each number will contain from 12 to 16 pages letter-press, print-ed in elegant type on splendid 4to paper. With the last numbers each subscriber or pur-

haser of the two volumes, will receive to each section of the work an allegoric title page, executed in a high style of art, and as a premium, magnificent steel engraving, 36 by 25 inches, representing The Battle of Bunker Hill, from Trumoull's great picture, whose superb execution renders it a costly ornament, and wkose subject wil nake it dear to every American. In the anticipation of a vast number of subscri

ECLECTIC MAGAZINE FOR '53.—The sphere and the utility of the ECLECTIC MAGAZINE have become too well defined to require explanation. Differing in aim from other magazines, panation. Differing in ann from other magazines, and supplying a want which is widely and increasingly felt by a more educated and intelligent portion of the community, it fills a place which could be filled in no other method than by the principle of selection which it adopts. The great reviews and magazines of Great Britain and the Continent through which the leading minds of the age are accustomed, almost exclusively, to express them selves, are too numerous to be reprinted, as well as too costly to be imported by the general reader They contain, likewise, much, with their desirab articles, that has but a temporary or local interest and which is worth to the American reader neithe the price nor time required to peruse it. To select from the whole field of journalism all that is really valuable, both the graver dissertations and discussions of the reviews, and the lighter and more versatile contents of the magazines, is the purpose of the ECLECTIC. The best parts of all are thus secured, without the cost or incumbrance of the local or feeble parts of any. The main portion of the ECLECTIC will continue to be composed of the great and eloquent articles of the review. the great and eloquent articles of the reviews while everything valuable or brilliant in all other periodical issues, particularly of Great Britain, will be carefully presented. A richer and more valuable aggregate will thus be furnished than the

contents of any single periodical could afford.

THE GLOBE: THE OFFICIAL PAPER OF CONGRESS,

AND NEWSPAPER FOR THE PEOPLE. It will be seen by the annexed extract from a letter of General Washington to David Stewart, dated New York, 17th March, 1790, that the idea of such a paper as I propose to make the Globe originated in the mind of the Father of his Country. He said:

"It is to be lamented that the editors of the different Gazettes in the Union do not more generally and more correctly (instead of stuffing their papers with scurrility and nonsensical declamation, which few would read if they were apprised of the contents) publish the debates in Congress on all great national questions. The principles upon which the difference of opinion arises, as well as the decisions, would then come fully before the public, and afford the best data for its judgment."—Sparks's Writings of Washington, vol. 10, p. 84.

THE DAILY GLOBE AND THE CONGRESSIONAL GLOBE In surrendering my interest in the organ of a great political party, I cherished the purpose of continuing the Congressional Globe, and, if possible, in time, to perfect it into a full history of the action of Congress giving the debates. of Congress, giving the debates accurately action of Congress, giving the debates accurately and fully with the proceedings—all stamped with the verity of an official record. From the passage in the letter of General Washington, which I have quoted, it will be perceived that he thought this office might be combined with that of a regular newspaper; and it is certain that the avidity of the public for news of the less important kind greatly contributes to give wing to the weightier matter which may be called Congressional news.

Having succeeded in my purpose of perfecting

Having succeeded in my purpose of perfecting the reports of the debates in Congress and giving them the official stamp, I now propose to send them abroad, in connection with the news of the day, in such haste as shall outstrip full and accu rate intelligence sent from the seat of Governmen in any other form whatever. It will even antici-pate the scraps of news forwarded to cities within two hundred and fifty miles of Washington by telegraph. Before the events thus transmitted are published in the morning papers, (for instance, of the city of New York.) the Globe containing them will have reached the post office of that city by the Express Mail of the previous night. The process by which this will be effected I now lay before the

I will have a corps of sixteen Reporters in Cor ress; each in succession will take notes during five minutes, then retire, prepare them for the Press, put them slip by slip in the hands of compositors, and thus, while a debate is going on in Congress, it will be put in type, and in a few minutes after it is ended it will be in print. I shall by this means, be enabled to send by the Express Mail of 5 o'clock p. m. for the East, West, and North, and by that of 9 o'clock p. m. for the South, all the proceedings of Congress up to the ordinary North, and by that of 9 o'clock p. m. for the South, all the proceedings of Congress up to the ordinary hour of adjournment. Thus the accurate debates of Congress will reach the cities two hundred and fifty miles from the Capitol before their daily morning papers are in circulation.

The miscellaneous news I shall be careful to

gather from remote sections of the country by tele-graph. I will obtain from the Executive Departments, through official sources, the matters of mo employed for the purpose, all the city news of con-sequence in sufficient time to be put into the Globe and mailed in the Express Mail trains. In this way I hope to create a new era in the dissemination of news from Washington. Hitherto no news paper has attempted to give authentic accounts of things done at Washington before the public mind at a distance had received its first impressions form irresponsible telegraphic dispatches, or by letter-writers biased by peculiar views.

Washington has now become so great a centre

of political interest during all the year—the pro-ceedings of the Executive Departments and the information collected by them even during the re cess of Congress is of so much importance to the interests of every section of the country—that shall continue the publication of the daily paper permanently, with a view to become the vehicle of the earliest and most correct intelligence.
It is part of my plan to reduce the price of the daily paper to half that of similar daily papers; and thus I hope to extend its circulation so as to invite advertisements. I will publish advertisements the Government. To subscribers in the cities hope to submit such terms as will induce them to advertise their business in every village through-out the Union, where the Globe is sent daily under the franks of members of Congress, all of whom take it, and some of them a large number of copies. The installation of a new Administration and a new Congress portends much change in the cours of public affairs as the result of the next session Many vast interests which were brought up in the last Congress were laid over by the Democratic majority to await the action of a Democratic Executive. The new modeling of the tariff; the new land system; the question of giving homesteads, and making every man a freeholder who may choose to become one; the approximation of the Atlantic and Pacific oceans by a national railroad across the territory of the Union; reform in the Army, Navy, and civil offices—all these great ques tions, with a thousand minor ones, deeply affecting will, now being matured by public opinion, up for the Government's decision. These new issues, cooperating with old ones, coming up to be disposed of by \*ew actors on the scenes at Wash agton, will be apt to modify greatly, if not alter ro these elements of interest another is likely

to be introduced by the interposition of the agita tions of Europe. After nearly forty years of peace in Europe there is an evident restlessness that now seems fraught with tendencies threatening war; and if war comes, in all likelihood there wil follow such universal change that the United States can scarcely hope to escape its vortex. Indeed from late events it is apparent that our government is already drawn into European difficulties. These circumstances are calculated to draw the public mind towards the next Congress with much ex-The DAILY GLOBE will be printed on fine paper double royal size, with small type, (brevier and nonpareil,) at five dollars a year. The Congressional Globe will also be printed

on a double royal sheet, in book form, royal quarto size, each number containing sixteen pages. The Congressional Globe proper will be made up of the proceedings of Congress and the running debates as given by the Reporters. The speeches which members may choose to write out themselves will, together with the messages of the President of the United States, the reports of the Executive Departments, and the laws passed by Congress, be added in an Appendix. Formerly I received subscriptions for the Congressional Globe and Appendix separately. But this has not been found satisfactory, inasmuch as it gave an incomplete view of the transactions in Congress; and therefore I have concluded not to sell them apart, considering that neighbors can have the advantage of both by clubbing, in case individuals shall find it too onerous to be at the charge of both. To facilitate the circulation of the Congressional Globe, and cheapen it to subscribers, Conquarto size, each number containing sixteen page ional Globe, and cheapen it to subscribers, Con-gress passed last year a joint resolution making it ree of postage. I annex it, as the law may no

Joint Resolution providing for the distribution of the Laws of Congress and the Debates thereon.

With a view to the cheap circulation of the laws of Congress and the debates contributing to the true interpretation thereof, and to make free the communication between the representative and constituent bodies:

Be it readved by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the present session of Congress, the Congressional Globe and Appendix, which contains the laws and the debates thereon, shall pass free through the mails so long as the same shall be published by order of Congress: Provided, That nothing herein shall be construed to authorize the circulation of the Daily Globe free of postage.

As I sell the Daily Globe at half the price of similar publications, so the Congressional, Globs and Appendix is sold for half the cost of so much composition, press-work, and paper. This I can afford to do, inasmuch as the subscription of Con-

afford to do, inasmuch as the subscription of Congress almost covers the cost of composition, and this enables me to sell for little more than the cost of press-work and paper. It requires the sale of about 9,000 copies to reimburse expenses. If 500 only were sold, the cost of each copy would be about \$104! The debates in the English Parliament cost about cleven times as much as I charge subscribers for the debates in Congress, equal in quantity, and as well reported and printed.

The next session of Congress will be a long one; and it is believed the Congressional Globe for it will reach 4,000 royal quarto pages, as the last one; and it is believed the Congressional Globe for it will reach 4,000 royal quarto pages, as the last long session made 3,842; and the long one before that made 3,901 royal quarto pages—four large volumes each session. If subscribers will be careful to file all the numbers received by them, I will supply any that may miscarry in the mails. This work increases in value as it grows old. The first seventeen volumes will now command three times, and some of the subsequent ones twice, their original subscription price.

The subscription price for the Congressional Globa (including the Appendix and the laws) is six dollars.
